

CCEE

Duration: 1.5 Days

Course Description: This is a certification course and is a series of PowerPoint slides, facility walkthroughs and small workgroup exercises covering:

- Security related Telco requirements
- Telco fire safety requirements for vendors
- Dust Control in the equipment environment
- Thermal shock and NEBS limits
- Electrostatic damage control
- Vibration control
- MOP Preparation
- Electrical Safety
- Personal Protective Equipment
- Special concerns about battery rooms
- Why are telcos almost rabid about grounding?
- What's so special about data centers?

Target Audience: The CCEE course is broadly designed for network people interfacing with construction contractors and for construction contractor foremen, leadmen, skilled and unskilled crafts-people who will work in a central office equipment room, power room or a data center environment. This training is geared for both the newcomer and the experienced employee.

Course materials supplied: A copy of all slides presented is provided. Certification is provided upon passing a written open-book test.

Min/Max class size: Although the target class size is 25 students, any class size from 5 to 100 is possible.

Prerequisite skills: General familiarization with central offices and data centers and construction techniques

Cost: As this is a suit-cased course, travel and living time and expense can have a significant impact on overall cost as will the availability of suitable conference room facilities. Please contact us for a site-specific quotation. We'll need to know the approximate headcount, where in the country and whether a suitable conference room is available.
